Dave,

Helen, Ben and I have discussed the options for moving forward on this issue. We recommend the following:

- Have a conversation w/ Dennis on next steps. Make sure he understands we have had several robust mtgs. w/ the Tribe on the technical issues of this TMDL. There is nothing new to say to the Tribe.
- As for another technical mtg. w/ the Tribe, in the development of the agenda we should ask, "What's New?". To date, they not presented any compelling biological basis (in terms of the fish, bull trout) for not approving the TMDL.

We would like to visit w/ you and Christine on this issue soon. Also, we would like to visit w/ Dennis soon, as well, while it is fresh in his mind.

Hope you have a fun time away,  
Don

Subject: Kalispel Consultation follow-up

I discussed next steps briefly with Psyk. We have two paths we can take in regards to coming back to RA on the technical differences the Kalispel identified.

1) set-up and give RA briefing or 2) send RA a write-up responding to technical issues raised by Kalispel in the consultation (issue and response format).

I am going to be out of the office until Thursday the 30th, so Don I will ask you to determine which path we take based on input from Helen and Ben.

After the RA communication we will need to offer to meet w/ Kalispel. thanks

Dave,

Attached is a the pieces I extracted from the previous briefing and did some slight editing. I at a loss on how to say the same thing in different words. We have been consistent w/ our message for over 2 years. In 2006, we acted as the convenor the modeling experts from all the jurisdictions and stakeholder to discuss the different approaches, and we have repeatedly worked to insure an open transparent flow of information. There have been consistently differences of scientific opinion among the stakeholders and agencies and Tribe. It is only in the last several years that Tribe has not agreed w/us.

I have a call into Joe Maroney to see if I can extract any useful information from him on their take and expectations of the consultation mtg. I send any info. I get on later.

Take care,  
Don

Dave,

Here some text to insert about the role of the TMDL in the 401 Certifications for the Box Canyon and Boundary dams.

"Ecology has negotiated 401 Water Quality Certifications for inclusion in the FERC licenses for the Pend Oreille PUD's Box Canyon (final) and Seattle City Light's Boundary (draft) dams. These Certifications contain stipulations, that require the development of a temperature attainment plans which are consistent with the TMDL and therefore enforceable. These temperature attainment plans are to be reviewed and approved by Ecology. EPA is supportive of this approach by Ecology."

Hope this helps,  
Don

Kim,

Here is the briefing document w/ the June 14th Agenda that, we gave Dennis. I thought I have sent you this document this morning. It should help w/ what our talking points will be tomorrow.

See you soon,

Don

Kim,

As requested, hope these documents are helpful. The Work Plan is an example of how we worked together from 2005-2009. The original MOA was signed in 2005. The June 13th briefing document was when Dennis / I met with the Tribal Chair, Deane and Joe at the Tribe's Spokane Casino.

Enjoy, see you soon,  
Don
